To Whom It May Concern:

I am a Texas licensed clinical psychologist. I have been in practice since 1983 and in private practice since 1987. I am a member of the National Register of Health Service Providers in Psychology and I also hold the Certificate of Professional Qualification in Psychology issued by the Association of State and Provincial Psychology Boards.

I have been using NeuroModulation Technique: The Feinberg Technique ("NMT") in my practice since March 22, 2004. I have used NMT with patients having a variety of presenting complaints including allergies, autism, addiction to prescription medication, non-essential tremor, hormone imbalance, heavy metal toxicity, acute and chronic pain, fibromyalgia, chronic fatigue syndrome, cardiac symptoms, respiratory problems and metabolic problems.

These patients have been treated with NMT as taught by use of the NMT seminar manual. I have found that the system works as disclosed, often in a remarkably short period of time. I have never encountered or been trained in a therapeutic modality that has been as useful in treating such a wide range of patients as I have found from the use of NMT in my practice. In several cases, a single session of NMT was sufficient to resolve allergies in patients who had suffered from the allergies for years.

Sincerely,

Robert H. Weiner, Ph.D.
